TEACHING PHILOSOPHY

My teaching philosophy is based on engaging my students to be active learners and critical thinkers. With that in mind, it is my role to facilitate an active learning environment where students can participate, be engaged, and use complex critical thinking skills in a variety of ways to appeal to the various learning styles. I believe that students learn best when they are actively engaged in their own learning and the results are that they are more receptive, more responsible, and typically have a better grasp of the material. Therefore, as a lecturer in the FYCS department I believe it is important to create a learning environment conducive to active learning.

- 1) Teach the fundamentals of FYCS,
- 2) Discover what students are most passionate about,
- 3) Get to know my students beyond being a face in my classroom,
- 4) Prepare students to function effectively both in the classroom and in the real world,
- 5) Facilitate the acquisition of life-long learning skills
- 6) Develop problem solving strategies, and
- 7) Foster critical thinking.
